Ground Floor - Coach House	2,051 ft ²
Total	13,404 ft ²

CONCEPT CGI | PRINCIPLE ELEVATION OF THE PROPOSAL

CONCEPT CGI | NORTH-WESTERN FASCADE OF THE PROPOSAL

MATERIALS & FINISHES

FN01 | Walling Stone

Coursed squared natural stone walling to the external walls of the house, the kitchen building and the coach house. Rough faced and laid to courses, with the dressed elements in cut ashlar of the same stone as FN10, FN11 and FN12. Stone type and source to be confirmed before a full application.

FN02 | Classical Order

All columns and pilasters are of the Tuscan order in cut ashlar: the entrance porch, the loggia arcade and the colonnade entrance.

FN03 | Roof Covering

Natural stone slate laid to diminishing courses to all pitched roofs. Stone slate type, and whether new or reclaimed, to be confirmed before a full application.

FN04 | Chimney Stack

Natural stone chimney stacks with moulded caps to the house, the kitchen building and the coach house.

FN09 | Classical Entablatures

Full Tuscan entablature to the entrance porch, the loggia arcade and the colonnade entrance: plain architrave, unornamented frieze and projecting moulded cornice. Order as FN02. Profiles and proportions to be confirmed before a full application.

FN10 | Ashlar Quoins

Cut ashlar quoins of the same stone as the walling to every external angle of the house, the kitchen building and the coach house. Laid in alternating long and short courses. Finely dressed to contrast with the coursed walling of FN01. Coursing module and margin widths to be confirmed before a full application.

FN11 | Ashlar Plinth

Cut ashlar plinth of the same stone as the walling running continuously around the base of the house, the kitchen building and the coach house, returned at all projections and terminated against the external ground level. Height, projection and weathering detail to be confirmed before a full application.

FN12 | Cut Ashlar Dressings

Cut ashlar dressings of the same stone as the walling to the window and door surrounds, cills, eaves cornice, canted bays, the two entrance compositions and the carriage arch. Finely dressed and moulded where shown. Profiles to be confirmed before a full application.

NOTES

PROJECT INTRODUCTION NOTES

IN01 | Pre-application enquiry

Drawings issued to Charnwood Borough Council for pre-application advice on a replacement dwelling at West Beacon Farm, with associated site works. Scheme at concept stage; materials, dimensions and levels to be fixed before a full application.

IN02 | Existing 1960s dwelling

Detached house, altered and extended over time: a low range, mostly single storey, with a one-and-a-half-storey element at one end and a later conservatory. Approximately 37,600 mm long and 456 m² over two floors. Demolish in full. Dimensions from Ordnance Survey data and marketing floor plans; to be confirmed by measured survey before a full application.

IN03 | Replacement dwelling

Country house of Georgian farmhouse character, in the area of the existing dwelling within the developed core of the holding. Two-storey main house with a second floor in the roof lit by hipped dormers, linked by an orangery and a colonnade entrance to a kitchen building designed to read as a converted barn.

IN04 | Coach house

Adjoining the kitchen building and designed to read as a converted stable range, with a carriage arch on the side access to the stables. Guest accommodation and utility rooms for the occupants of the main house.

IN05 | Architectural character

Principal elevations symmetrical about their centre lines and set out to classical proportion, with window heights diminishing from ground floor to first floor and again at the dormers. Tuscan order throughout; ornament concentrated at the entrances, the loggia, the canted bays and the eaves. Coursed natural stone walling, cut ashlar dressings and natural stone slate roofs to FN01-FN12.

IN06 | Footprint and scale

Principal block 23,270 x 18,100 mm, about 14 m shorter across the site than the existing range, with its area gained in depth and height. Ground floor gross internal area 548.58 m² across the main house, orangery, kitchen building and stores; upper floors and coach house additional.

IN07 | Wider site proposals

Horseshoe carriage drive, rear swimming pool, indicative four-car timber carport and hangar privacy hedge. Asbestos-roofed hay barn and stable building replaced by three single-storey studio buildings: two home office workspaces, one with a podcasting studio, and a private gym, with five parking spaces. Lake, hangar and part of the landing strip retained. Refer to SP01-SP18.

IN08 | Concept visualisations

Concept CGIs on this sheet: the south east entrance front and the north west garden front. Planting and landscaping indicative. Explore the full three-dimensional model through the QR code.

IN09 | Matters for advice

Advice sought on: the policy basis for a replacement dwelling; scale, massing and landscape effect; demolition of the existing dwelling; the studio buildings replacing the hay barn; the stone and stone slate palette; the surveys, reports and validation documents needed for a full application.

BUILDING FEATURES - NORTH WEST ELEVATION - MAIN HOUSE

EN01 | Entrance Composition

Central entrance: six-panel painted timber door with narrow sidelights, on cut ashlar jambs standing on plinth blocks. A deep moulded entablature with projecting cornice sits above, and a semicircular radial fanlight above that, framed by concentric moulded archivolts.

EN02 | Canted Bay Windows

Canted bays flank the entrance, in cut ashlar throughout, with a moulded cornice and blocking course at the head. French doors to the centre face and sashes to the splayed returns, opening onto the terrace.

EN04 | Orangery Link

Orangery between the house and the kitchen building: painted timber, glazed the full height of its bays, under a bespoke glazed lantern, applicant to consider a traditional manufacturer such as Vale Garden House who can provide the level of finish required for such a bespoke painted hardwood orangery structure..

EN05 | Kitchen Building Gable Openings

Kitchen building gable: two tall arched openings with radial fanlights in cut ashlar surrounds. Stone chimney stack against the gable.

BUILDING FEATURES - SOUTH EAST ELEVATION - MAIN HOUSE

ES01 | Entrance Porch

Central entrance: a pair of Tuscan columns on plinth blocks carry a full entablature with a projecting moulded cornice. Beneath it a six-panel painted timber door with a semicircular radial fanlight, dressed in cut ashlar and approached over stone steps. The porch projects slightly from the wall plane.

ES02 | Window Hierarchy

Tripartite ground floor windows flank the entrance beneath cambered heads with moulded ashlar surrounds, and are the tallest openings on the building. First floor sashes are shorter and set in plainer surrounds.

ES03 | Roof And Dormers

Hipped roof with three hipped dormers lighting the second floor. Dormer cheek and roof finish to be confirmed before a full application.

ES05 | Colonnade Entrance

Single-storey colonnade entrance to the right of the main block: Tuscan columns flanking a glazed painted timber door, with flat ashlar lintels over the windows either side, beneath a flat roof with a moulded cornice. Leads through to the kitchen building and the coach house.

BUILDING FEATURES - SOUTH WEST ELEVATION - MAIN HOUSE

EW01 | Loggia Arcade

Three arched openings in a recessed bay at ground floor. Tuscan columns, with matching responds returned against the flanking walls, carry a full entablature with plain frieze and projecting cornice. French doors beneath radial fanlights to each arch. The arcade is recessed within the wall plane and does not project beyond the elevation.
