

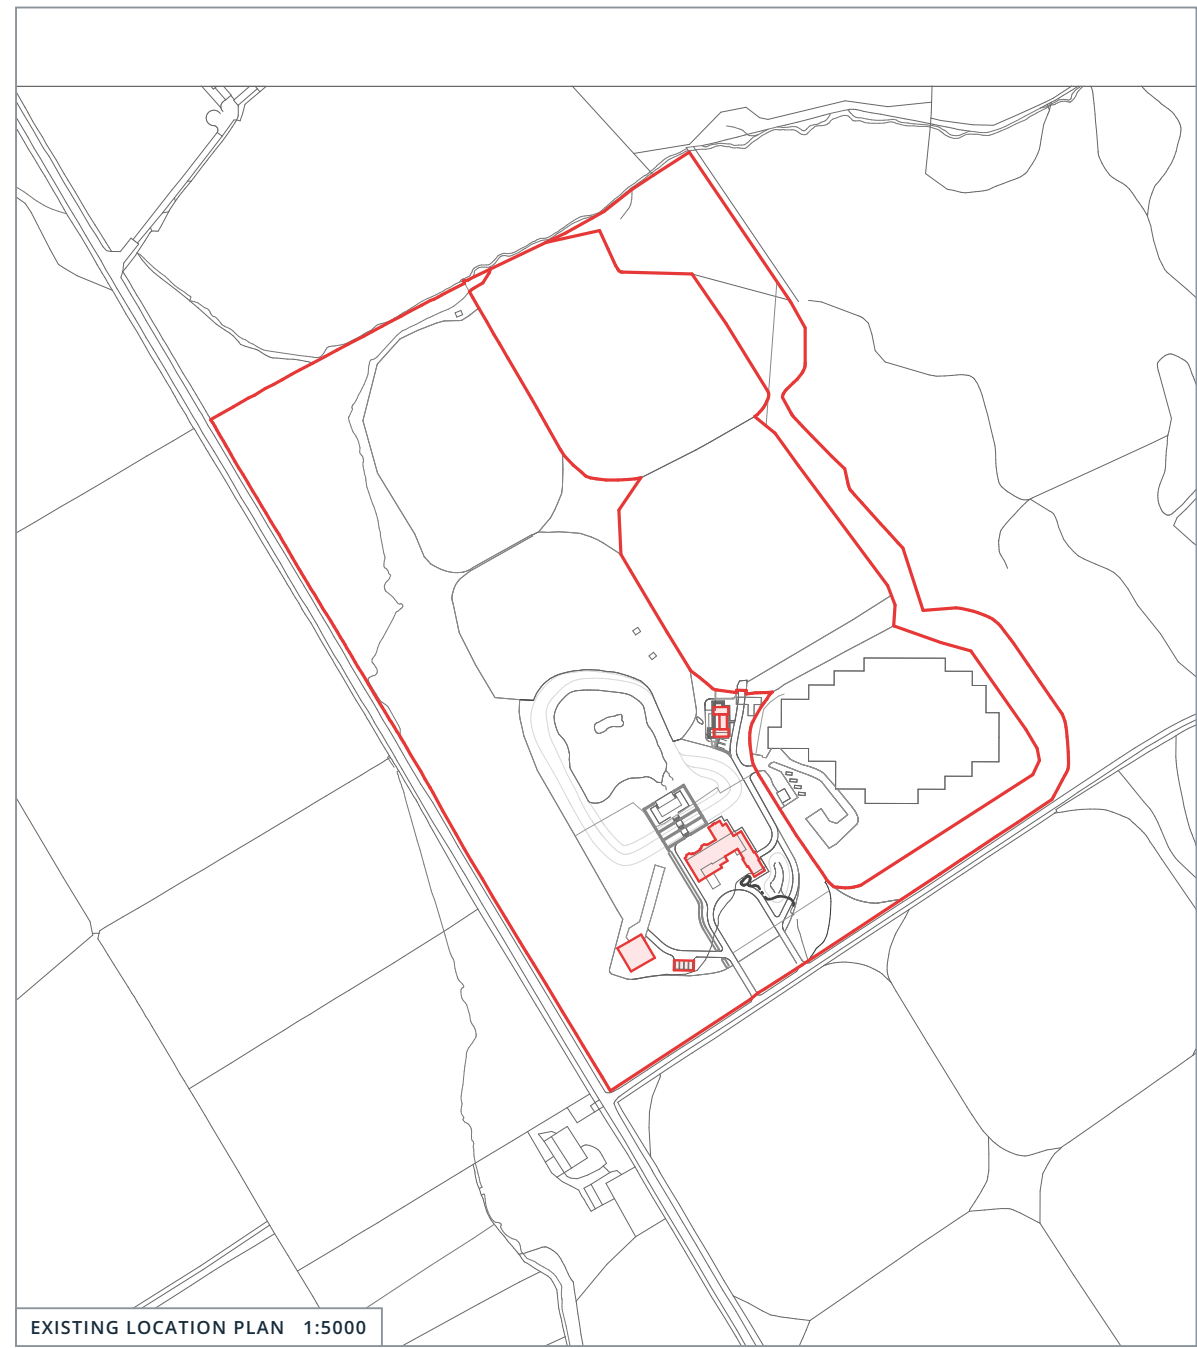

EXHIBIT 2 Existing aerial map

Existing ground-mounted solar PV array extends the hay barn and stables shed, reached from the internal access road. The array remains shown on the proposed site plan.

SP01 | Replacement house

Replacement house to be built on the main house, linked to kitchen building and coach house. Principal entrance faces the horseshoe drive; rear garden faces the proposed pool and existing lake.

SP02 | Horseshoe carriage drive

New horseshoe shaped drive to the principal entrance, joining Deans Lane at the accesses of SP04 and SP16. The site plan and arcs shown are illustrative only and not designed vehicle geometry. Applicant to appoint a civil engineer to design alignment, widths, tracking and surfacing before a full application.

SP03 | Lake House access route

New side access roadway through the carriage arch of CO2 to the Lake House of SP04 and the field access to SP16. The Lake House joined to it by a 2,500 m gravel path from the middle units parking of SP17 opens onto it. Service access road of SP22 joins it beyond the arch. Coach house and stables shed to be removed. Applicant to appoint a civil engineer to confirm them, with pedestrian access, before a full application.

SP04 | Lake House outbuildings

Three small outbuildings on the hay barn site of SE02. Each 9,800 x 4,000 mm, max. 4,500 mm high overall to the manufacturer's figure, dual-pitched roof, rigid insulation, double glazed doors and roof. Floor levels and Borne palette colour to be confirmed before a full application. Arranged as a north-south U, the middle unit set to the east, leaving a cleared foot-couling face the lake. Use to SP18; foundations to SP14, decking to SP16.

SP05 | Landing strip retention

Retention of existing landing strip serving the hangar. Reconfigure the connecting road to meet the new driveway, retained and removed surfacing to be measured from the applicant's topographical survey before a full application.

SP06 | Side road to hangar parking

New side road through the tree line and between the hangar and the approach from the original driveway, serving the parking of SP07. Alignment and turning shown are illustrative. Applicant to appoint a civil engineer, and an arboriculturist for tree removal, before a full application.

SP07 | Parking and potential future carport

Four open parking spaces adjacent to the tree line at the end of the side road of SP06; designed to be used for the carport, with a driveway front, overalls for grooms and hangar visitors. No carport or other structure forms part of this application; the area may be considered for a carport in future. Surfacing and layout to be designed by the applicant's civil engineer before a full application.

SP08 | Infinity-pool upgrade

Upgrade of the existing paved infinity pool, on the central axis of the house, in a paved surround on two levels. Infinity edge to the lake-facing north-west side, with a lower paved terrace below it, 12,400 x 5,000 mm, reached by three steps at each end. Applicant to appoint a pool specialist and engineers to design levels, retaining edges, overflow, drainage; pool deck, lighting, fountains and plants located before a full application.

SP09 | Central garden steps

Steps 4,000 mm wide on the axis of the house, from the house terrace down through the existing lawn terraces of SP12 to the pool surround of SP08, in three flights with two paved landings. Levels shown are illustrative; levels, rises, retaining edges and step-free access to be fixed from the applicant's topographical survey before a full application.

SP10 | Hangar privacy hedge

New privacy hedge along the hangar line. Alignment, species, planting size, spacing and maintenance regime to be confirmed by the applicant's landscape architect before a full application, with the sightlines and retained trees.

SP11 | Relocated pond

New pond, 10 m x 11 m, 11 m² at fullness, five times the old pond of SE10, between the horse drive and the service access road of SP02. Margins and planting designed as habitats and planted to blend before the old pond is filled. Further ponds of the new survey of SE10 requires them. Levels and bank profiles to the topographical survey before a full application; drainage to SP23.

SP12 | Tree and woodland clearance

Woodland cleared, about 1,070 m² for the service access road of SP02, the pond of SP11, the infinity pool and the new driveway. Local access to the pond, the infinity pool and the trees at the accesses and parking. Applicant to appoint an arboriculturist to assess the trees and identify individual removals; protection and replacement planning before a full application. Tree heights and number of steps to suit levels from the applicant's topographical survey before a full application, where possible, keeping the woodland clear along Deans Lane.

SP13 | Internal fence removal

Remove the internal fences identified within the revised garden layout, including the fence/ponding between house and lake. Removal applications shown are indicative, to be confirmed by the applicant's civil engineer. No external boundary removals are proposed.

SP14 | Lake House foundations

Lake House of SP04 on auger piles; Borne ground screws, number and size set by a soil test. Foundations to be confirmed by the applicant's civil engineer, and the auger piles to be drilled away and the screws withdrawn, returning the ground to grass. Screen positions to the design of Borne and the applicant's structural engineer, set out with the applicant's arboriculturist where they fall within the north protection areas of retained trees.

SP15 | Raised decking

New decking, 3,000 mm wide, on the Lake House of SP04. West coast between the units, 3,900 x 9,800 mm, facing the lake. South: 3,000 mm projection to the west, facing the lake. North: 3,000 mm projection to the north. Each deck with about three steps down to the ground level. Deck heights and number of steps to suit levels from the applicant's topographical survey before a full application.

SP16 | Field gate access

Existing field gate to the site boundary beyond the Lake House retained, with the track to it. Straight vehicle access to the gate kept clear along the roadway east of the Lake House; no parking or other structures to be proposed between the gate and the house.

SP17 | Lake House driveway

Two new roads to the site boundary east of the Lake House, opening onto the access roadway of SP03. Sufficient for the household and the occasional visitor. New hedge along the north and west sides to SP19.

SP18 | Lake House use

Lake House of SP04 used as a home office, home recording studio and home gym by the occupiers, subject to the applicant's permission. Use: Clay C3, and Category D1. Not for sleeping, nor for sleeping or sleeping accommodation. Not business premises; no separate use.

SP19 | Hedge and infill planting

New hedge, about 19.8 m long, along the south and west sides of the parking of SP17. Small area of new tree planting south-west of the parking, linking the hedge to the existing CO2 arch and the existing access road of SP03 opening to be set by the applicant's landscape architect before a full application.

SP20 | Shelter and firebreak planting

New sheltering north of the Lake House of SP04, up to the site boundary, as a shelter belt. Trees, hedges back about 5 m from the north and west walls, with gravel and grass benches and a gravel path to the site boundary. Use: Clay C3, and Category D1. Not for individual tree removals to the applicant's arboriculturist. Species, sizes and spacing to be set by the applicant's landscape architect before a full application.

SP21 | Hedged lawn terraces

Three level lawns step down from the house to the pool of SP04, a clipped hedge at each level, and a lawn of 15,000 mm wide at the pool. The lawn. Automatic gate linked to the carriage arch at the steps and corners. Levels from the applicant's topographical survey; hedge planting to be confirmed by the applicant's civil engineer. Use: Clay C3, and Category D1. Not for individual tree removals to be set by the applicant's arboriculturist. Species and sizes to be agreed with the local highway authority for full application status, as advised by the LPA.

SP22 | Service access road

New access road, 4,000 mm wide, from the horseshoe drive's east arm to the Lake House of SP04 beyond the carriage arch, for occasional deliveries and larger vehicles; the arch of CO2 to be removed. Service access road to mobility scooter and access design to be agreed with the local highway authority for full application status, as advised by the LPA.

SP23 | Drainage

Pond and drainage behind the driveway/ pool zone, taking their surface water through soil control. As drawn, overflow at a controlled rate to the retained lower channel of the existing watercourse, subject to the survey confirming it. Any spring or watercourse feeding the CO2 arch to be removed. Drainage to be confirmed by the applicant's civil engineer, and the drainage with the County Council's consent. Applicant to appoint a drainage engineer to design the surface water scheme before a full application.

SP24 | Original site access

Existing gated entrance from Deans Lane of SE13, retained. Sees the horseshoe drive of SP04, and a complete Building Regulations specification. Obtain coordinated construction details, structural calculations; and Building Control approval before relevant work starts. Refer discrepancies to Nott Architecture before proceeding.

SP25 | New site access

Second vehicular access onto Deans Lane, north-east of the original access of SP24, where the east arm of the horseshoe drive of SP02 meets the lake. Automatic gate linked to the carriage arch. Service access road to mobility scooter and access design to be agreed with the local highway authority for full application status, as advised by the LPA.

GN01 | Drawing Scope

Drawings describe the proposed development for planning assessment. They are not intended to be used for a complete Building Regulations specification. Obtain coordinated construction details, structural calculations; and Building Control approval before relevant work starts. Refer discrepancies to Nott Architecture before proceeding.

GN02 | Survey And Dimensions

Site information derived from a photogrammetric aerial survey of the housing, with purchased timbered debris and the site plan. No measured building survey of the existing dwelling has been carried out. Proposed buildings are derived from Nott Architecture's three-dimensional model. Do not scale from these drawings. Verify all dimensions.

GN03 | Pre-Application Planning

Issues for pre-application planning, dimensions and levels are indicated at this stage and to be fixed before a planning application.
